MERN Stack Developer

Betasys.ai

Mar 2025 - Sept 2025

- Developing and maintaining scalable web applications using React.js, Node.js, and MongoDB, while implementing reusable components and managing state with Redux Toolkit.

Web Developer Intern

Webdroid Edutech

Dec 2022 - June 2023

- Worked on building responsive websites using HTML, CSS, JavaScript, and React.js.

Projects

Personal Portfolio

- Developed a fully responsive and interactive personal portfolio website using React.js, Tailwind CSS, and Framer Motion, featuring smooth animations, structured navigation with React Router, and showcasing skills, services, and work experience. The portfolio also provides easy contact access for potential employers and clients.

Blog Management

- A fully responsive multi-page Blog Management web application built with Vite, React, HTML, and Tailwind CSS. It demonstrates efficient global state handling using Redux Toolkit with React Hooks, incorporates seamless navigation with React Router DOM, and implements complete CRUD operations within a clean and modular component structure. The application is deployed on Render for accessibility and performance.
